

QUALITY POLICY

LOVATO ELECTRIC INC is engaged in the assembly, marketing, and distribution of low-voltage electrical and electronic devices for industrial applications.

To provide this service and maintain a high level of quality, the organization is committed to making every possible effort to:

- Provide personalized, high-quality customer service to ensure products meet customer requirements.
- Provide support for the development of new products in collaboration with customers, when required.
- Involve organizational personnel in quality-related activities and promote continual improvement.
- Maintain up-to-date employee training to ensure they can perform their assigned tasks, and inform all personnel about the operation of the Quality Management System and the established quality objectives.
- Comply with applicable legal requirements, as well as other requirements to which the organization subscribes.
- Satisfy the needs of customers and other interested parties.

By implementing these actions, LOVATO ELECTRIC INC is committed to continually improving the effectiveness of the Quality Management System.

Furthermore, to ensure compliance with this Quality Policy, Management commits to establishing quality objectives consistent with this policy and to periodically reviewing the system to ensure its effectiveness, thereby serving as a permanent guide and reference for the organization.
